

### Positive Products

JA is committed to buying, specifying and using positive products and services. Our commitment to a healthy community and planet inform all our purchases. Products that we will not buy or be associated with in anyway include:

- Manufacture or provision of products and services such as armaments and firearms, alcohol, tobacco, narcotics and other illicit drugs, pornography, fossil fuel extraction and refining, products made from known or suspected carcinogens and chemicals, products made from petroleum byproducts, or the nuclear industry;
- Involvement in gambling, prostitution, payday lending, genetically modified foods or patenting life.

JA seeks to work with other firms and corporations who share our commitment to positive products and limit our involvement, purchases and uses to positive products.
