

Living Wage Policy

Schemata Workshop is committed to providing financial compensation of, at minimum, a living wage to all employees. A living wage is defined as financial compensation that reflects what an individual needs to support themselves and their family above the poverty line, is based on the actual cost of living within a community, and helps provide an adequate standard of living.

Schemata Workshop will use the Poverty in America: Living Wage Calculator as the basic tool in determining the minimum wage it pays to employees. Schemata makes every effort to provide competitive compensation at industry and market standards.

Schemata Workshop will advocate for the benefits and payment of a living wage at other organizations.
