

Positive Products

LWA is committed to only be involved with products and services that have a positive impact on the environment, people and communities.

In-house, LWA strives to purchase only positive products from local suppliers for office operations and emphasizes the importance of recycling by offering yearly statistics of recycled office materials. Employees are encouraged to use washable dishware, mugs, and glasses. We use locally owned and operated companies for recycling services. As design professionals, we strive to specify materials to be used in construction that are environmentally positive materials.

LWA is not involved in the manufacture of products and services as armaments and firearms, alcohol, tobacco, narcotics and other illicit drugs, gambling, pornography, prostitution, payday lending, organized crime, clear-cut logging, genetically-modified foods or patenting life, fossil fuel extraction and refining, known or suspected carcinogens, and the nuclear industry.

LWA chooses to provide services to clients that make a positive contribution towards education, energy and resource conservation, public transportation, social justice, historic preservation, cultural enrichment and livable and walkable communities.

LWA is an advocate for environmental and social sustainability and strongly supports renewable energy, advancement in education, promotion of the arts and sciences and the elimination of discrimination and other social and economic inequalities.
