

## STEWARDSHIP

### ANIMAL WELFARE

*The work that Holst does supports societal good by providing buildings that are durable, healthy, energy efficient and supportive of strong communities. We take great pride in our extensive work in Social Impact projects such as affordable housing, shelters for the homeless, as well as housing and treatment for individuals battling substance abuse.*

*Holst Architecture does not condone or support animal testing or experimentation in any way. We do not have any interactions any slaughterhouses or with organizations involved in raising animals in inhumane conditions such as subjecting them to physical abuse, restrictive enclosures, overcrowded pens, or dirty conditions. Holst will commits to never becoming involved with organizations that participate in any of these activities.*
