

Living Wage Policy

Effective march 12, 2019

Bassetti Architects is committed to providing a Living Wage* as a minimum for all full-time employees. A Living Wage is defined as financial compensation that reflects what individuals need to support themselves and one adult above the poverty line, based on the actual costs of living in a specific community. A Living Wage helps with the basic and essential costs of living and helps to provide an adequate standard of living.

*Living Wage is calculated using the MIT living wage calculator for 2 Adults (One Working) (<http://livingwage.mit.edu/>).

Bassetti Architects will advocate the benefits and payment of a Living Wage to other organizations.
