

POLICY

LIVING WAGE

Atelier Ten is committed to providing a minimum of a Living Wage for all employees. A Living Wage is defined as financial compensation that reflects what individuals need to support themselves and their families above the poverty line, based on the actual costs of living in a specific community. A Living Wage helps with the basic and essential costs of living and helps to provide an adequate standard of living.

Atelier Ten will use the Poverty in America: Living Wage Calculator as the basic tool for determining the minimum Living Wage it needs to pay our employees.

Atelier Ten will advocate the benefits and payment of a Living Wage to other organizations.
