

## Local Sourcing Policy

Local sourcing is an important part of communities and their economies. It presents an opportunity for organizations to ensure a dependable source of supply of goods and services while enhancing the local economy and strengthening the social health of communities. Energy Opportunities will procure its goods and services through local sourcing, when possible. EO will actively seek local sources for procurement of goods and services on an on-going basis.

Energy Opportunities maintains a membership in the Buy Local Coalition - <http://www.buylocalcoalition.com/> - serving York County Pennsylvania and the Susquehanna Sustainable Business Network - <http://susquehannasbn.org/> - serving south central Pennsylvania.
