

L02. Local Sourcing

Local sourcing or buying local is an important component of healthy and sustainable communities and economies. Local sourcing represents an opportunity for organizations to ensure a sustainable supply of goods and services while building a more locally based, self-sustaining, economy and strengthening the social health of communities. Ambient Energy will search out local sourcing opportunities for our needs. When possible, we will make purchases of goods and services from sources within a 300-mile radius from our offices as a geographic component of local sourcing and a 600-mile radius for regional sourcing.
