LOCAL SOURCING

Local sourcing or buying local is an important component of healthy and sustainable communities and economies. Local sourcing represents an opportunity for organizations to ensure a sustainable supply of goods and services while building a more locally based, self-sustaining, economy and strengthening the social health of communities. FSi will search out local sourcing opportunities for our needs. When possible, we will make purchases of goods and services from independent, locally owned sources within a 300-mile local radius from our offices and a 600-mile radius for regional sourcing.
