

LOCAL SOURCING

Local sourcing or buying local is an important component of healthy and sustainable communities and economies. Local sourcing represents an opportunity for organizations to ensure a sustainable supply of goods and services while building a more locally based, self-sustaining, economy and strengthening the social health of communities. ILFI will search out local sourcing opportunities for our needs. When possible, we will make purchases of goods and services from sources within a 300-mile radius from our offices as a geographic component of local sourcing and a 600-mile radius for regional sourcing.

iLEAP will be an advocate and an active member of a Local Sourcing/Shop Local group wherever it has offices or business locations with a minimum of thirty employees.
