

Local Sourcing

Local sourcing or buying local is an important component of healthy and sustainable communities and economies. Local sourcing represents an opportunity for organizations to ensure a sustainable supply of goods and services while building a more locally based, self-sustaining, economy and strengthening the social health of communities. Integrated Eco Strategy is committed to supporting our local communities and, whenever possible, we will make purchases of goods and services from local sources. IES will also advocate for local sourcing on the projects on which we consult.
