

Occupational Safety Policy

We understand environment plays a crucial role in the happiness of our employees and strive to provide a safe and healthy work environment for our team. Maintaining this environment is a team effort and we request that our team members play an active role in this regard by immediately reporting health and safety concerns to managing partner Dale Duncan or office manager Bonnie Tabb.

In the daily course of our business, our team is not exposed to hazardous chemicals or other hazardous materials or situations. When visiting job sites employees are required to comply with all contractors' safety and health protocols.
