

Responsible Investing

Energy Opportunities supports socially responsible investing. Socially responsible investing is an investment in people, community, environment and country as well as in the prosperity of organizations. Employees have the option of establishing a self-managing, brokerage retirement account. We patronize ethical businesses that have positive benefits, treat their employees fairly and with respect. We do not condone, support or participate in practices, products or services that are harmful to society or the environment. Energy Opportunities has neither an investment portfolio nor portfolio assets. We use a local credit union for our banking services.
