

Volunteering Policy

Energy Opportunities is committed to demonstrating the nature and extent of our community volunteer involvement. Community volunteering by an organization is an investment in its community and its peoples. Volunteering provides valuable community services and strengthens a community in many ways such as supporting families, improving schools, supporting youth, and beautifying the community. Community volunteering is an important measure of the civic health of a community, a state and a nation.

Energy Opportunities provides up to 40 hours of paid time annually for each employee to participate in volunteer activities as a service to a recognized charitable, or non-profit organization engaged in activities related to green buildings.
